

# RUFOCOIN WHITEPAPER

## LEGAL NOTICE

Rufocoin does not constitute an investment that may generate future profits, as it lacks intrinsic or tangible value. Purchasing the tokens involves high risk, and there is no guarantee of reimbursement or value return. Developers of Rufocoin are not responsible for any potential losses incurred from operating with the tokens.

## EXECUTIVE SUMMARY

Rufocoin is a cryptocurrency designed to raise funds to support organizations dedicated to rescuing street puppies, providing them with the necessary resources for their food, care and medical treatments. Our goal is to provide assistance to the most needy puppies and promote their well-being.

## INTRODUCTION

Animal abandonment, especially of puppies, is a global issue that requires urgent attention. Rufocoin is proposed as an innovative solution to raise funds and support organizations dedicated to rescuing and caring for these defenseless animals.

## MAIN GOAL

To raise funds through the utilization of blockchain technology, to finance organizations dedicated to the rescue, feeding, care, and medical treatment of abandoned puppies on the streets. We aim to ensure that these animals receive the necessary support to have a dignified and happy life.

## SECONDARY GOALS

1. **Community:** Establish a strong community to grow and strengthen Rufocoin's ideals.
2. **Limited Token Supply:** A total of 765.000.000 tokens will be created with no possibility of increasing their creation.
3. **Token Ownership Renouncement:** The irrevocable renouncement of token governance ensures our transparency intentions and provides people with security.

4. **Deflationary Token:** We will implement a token burning policy of 0.01% for each Rufocoin transaction on the Ethereum Layer 2 Base network. This will help make the currency deflationary, potentially increasing its value over time.
5. **Donation Commission:** For each Rufocoin transaction on the Ethereum Layer 2 Base network, a small commission of 0.01% will be applied. These funds will be directly allocated to fulfill our primary objective of supporting puppy rescue organizations, reflected in the wallet available for verification at all times.
6. **Transparency:** We will be fully transparent with the funds raised for people's peace of mind and security. We will maintain a publicly accessible map on our website clearly showing where donations will go.
7. **Listing on Exchange Platforms:** We will actively seek to list Rufocoin on popular exchange platforms to enhance its accessibility and liquidity.
8. **Safeguarding Donated Funds:** The funds raised will be securely stored in a wallet dedicated exclusively to this purpose, with the link available on the Rufocoin website at all times.
9. **Investment in Web Development, Advertising, and Marketing:** Part of the funds raised will be used to enhance our online presence, raise awareness about Rufocoin, and promote its adoption based on our primary focus.

## **UNDERLYING TECHNOLOGY**

Rufocoin is built on blockchain technology, launched on the Ethereum Layer 2 Base network, ensuring the security and transparency of all transactions. We will implement additional security measures to protect funds and token integrity.

## **ROADMAP**

- **PHASE 1:** Implementation of the token burning policy and optimized donation commission. Initial launch of Rufocoin and establishment of network foundations. Development and release of the interactive donation map on the Rufocoin website.
- **PHASE 2:** Marketing and Advertising, strategic partnerships.
- **PHASE 3:** Listing on popular exchange platforms and increasing Rufocoin's visibility.

- **PHASE 4:** Expansion of fundraising operations and promotion of Rufocoin adoption globally.

## **CONCLUSION**

Rufocoin is committed to providing support to street puppies and improving their quality of life. With a combination of innovative technology, total transparency, and a dedicated community, we aim to make a significant difference in the lives of these needy animals.
